**We Sleep Around** Susie Davidson 2015-05-28 After years of dreaming and planning, we sold our San Diego County home in 2002. We have been traveling for thirteen years, and have slept in more than 800 beds in 45 states and several foreign countries. Early in our travels, we discovered house and pet sitting. When people travel, we live in their homes, loving and caring for their pets and plants. "We Sleep Around" shares the story of our first five years of traveling. Leaving our home for the last time, we thought it might be a five year adventure. This book ends when Bill departs for Baghdad, Iraq for a contract assignment with the U.S. Government. Continuing our adventure we will be "Still Sleeping Around," and finally "Done Sleeping Around." Although not for everyone, house and pet sitting has greatly enhanced our opportunity to travel. We will continue until someday we grow up and say, "enough" and close the book on our final chapter of traveling.

**Race Tech's Motorcycle Suspension Bible** Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
