Villegas 2020-09-15 North of El Norte provides an important counterpoint to the attention given to Mexican migration to the United States by examining a lesser-known migration route: that taken b by contemporary Mexican migrants to Canada. Paloma Villegas examines not only the implications of changing Canadian immigration policy and practice but also the barriers that migrants without permanent resident status encounter once in Canada, specifically in the labour market, in their creative pursuits, and in accessing health care. Her comprehensive research sheds light on how individuals and institutions work to illegalize migrants and on the migrants' active resistance to those efforts.

A Detailed Survey On Religiosity And Paranormal Experiences JACKSAN JUDAN FERNANDES 2020-10-24 This study is about people in their formative years. It is about their beliefs and practices. It is about their personality and how it relates to their beliefs. It involves empirical investigation of 1800 college going men (882) and women (918) with an average age of about 20 years. The subjects are predominantly Hindu (85%), with 12% Christian and 3% Muslim student attending colleges in Visakhapatnam urban area. Data were collected from them using the Myers-Briggs Type Indicator (MBTI) and the two specially developed questionnaires that survey religiosity and paranormal beliefs and experiences. Paranormal beliefs and experiences surveyed included sacred as well as secular beliefs, experiences, and practices. While several studies in the West attempted to explore the relationships between personality, paranormal beliefs and religious practices and experiences, there are hardly any investigations in non-Judeo-Christian cultures. The present study can help by throwing light on the cross-cultural relevance of these findings.

Life And Death At Paloma Jeffrey Quilter 1989 Gold, pomp, and circumstances surrounded the mummies of Inca emperors, but the elaborate funerary rites at the end of prehistory were only part of a tradition that began thousands of years earlier. Life and Death at Paloma, the first in-depth treatment of burials from a preagricultural South American village, analyzes the life of its people during a revolutionary time in prehistory: the transition from a hunting-gathering-fishing way of life to a more sedentary horticultural society. Drawing upon the data that he collected as part of the University of Missouri's excavations at Paloma, Jeffrey Quilter gives us the first study of preceramic Peruvian life through his analysis of this site's graves and contents. His extensively illustrated book is also the first attempt to infer social organization from such data for this period—circa 5000 to 2500 B.C.—in Peru. In addition, he presents the only available summary and discussion of the known preceramic interments from western South America. Coastal Peru is one of the few New World regions where the early development of complex societies can be studied. Life and Death at Paloma will greatly assist such research by specialists in mortuary studies, in Andean prehistory, and in hunter-gatherer societies.

Keeping the format that made the first edition so popular, the second edition features dramatic changes both in species coverage and the data quality. The new edition compiles the results of new samples that have been published for many of the birds included in the first edition, and data found for about 2400 new species, increasing the coverage to over 8700 species, about 85% of the world’s birds. The order of species and families has been revised in the text to fit with the latest publications in avian taxonomy and systematics. The second edition includes an accompanying CD-ROM with a searchable electronic database.

Handbook of Research in Educational Communications and Technology M. J. Bishop 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field. However, given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996, the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies, rather than to focus on the things we are using to solve those problems. Additionally, for the first time this edition of the Handbook reflects our field’s growing understanding of the importance of design scholarship to inform practice by including design case chapters. These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education’s increasingly complex issues. Provides comprehensive reviews of new developments in educational technology research and design practice. Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems. Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology.

We can! Agata de Latour 2017-05-23 Combating hate speech offline and online: a new tool to help young people and educators to confront, dismantle and replace hateful narratives. Online hate speech has become a major form of human rights abuse, with serious, sometimes tragic consequences, both online and offline. Hate speech cannot be allowed to proliferate without being challenged and exposed in its nature: prejudicial views on social groups combined with fake news which feed phobias and fears, seem attractive as narratives. Narratives give a meaning to information presented because they connect with what people believe, or want to believe in.Their widespread presence online accredits their claims for legitimacy. But narratives are rarely the truth and never the whole truth. When they are used to oppress people, as in hate speech, the fundamentals of a pluralistic and democratic society are undermined, and the lives and dignity of people are at risk. Counter narratives are thus needed to discredit and deconstruct the narratives on which hate speech is based. Alternative narratives

are also needed to reinforce positive values and perspectives which support human rights and democratic citizenship, such as solidarity, respect for diversity, freedom and equality. Young people need to occupy online public space with positive narratives based on hope and love. This manual presents communicative and educational approaches and tools for youth and other human rights activists to develop their own counter and alternative narratives to hate speech. It is designed for working with young people from the age of 13, and is based on the principles of human rights education and youth participation. Anyone can take action against speech. By providing insights into hate speech and human rights, and a methodology for producing counter narratives, We Can makes that action easier, more effective and positive. The Council of Europe launched the No Hate Speech Movement campaign to mobilise young people for human rights online and to combat hate speech. Education plays a central role in the campaign. This manual complements Bookmarks - A manual for combating hate speech online through human rights education, also published by the Council of Europe.

With a Book in Their Hands Manuel M. Martín-Rodríguez 2014-06-30 First Place Winner of the 2015 International Latino Book Award for Best Latino Focused Nonfiction Book Literary history is a history of reading. What happens during the act of reading is the subject of the branch of literary scholarship known as reader-response theory. Does the text guide the reader? Does the reader operate independently of the text? Questions like these shape the approach of the essays in this book, edited by a scholar known for his groundbreaking work in using reader-response theory as a window into Chicana and Chicano literature. Manuel M. Martín-Rodríguez has overseen several research projects aimed at documenting Chicana and Chicano reading practices and experiences. Here he gathers diverse and passionate accounts of reading drawn from that research. For many, books served as refuges from the sorrows of a childhood marked by violence or parental abandonment. Several of the contributors here salute the roles of teachers in introducing poetry and stories into their lives.

Child and Adolescent Development in Risky Adverse Contexts Blanca Estela Barcelata Eguarte 2022-01-01 This book analyzes the factors and mechanisms involved in the development and adaptation of children and adolescents to adverse and risky contexts in four Latin American countries: Argentina, Brazil, Chile and Mexico. The experience of growing up in contexts of poverty and social vulnerability is a risk factor for child and adolescent development which may produce a series of negative effects in their adulthood, including mental disorders. This is a global concern, but so far the majority of literature about the topic has focused on developed countries. This volume aims to enrich the international literature by presenting results of research carried out in developing countries, showing how children and adolescents deal with adverse and risky contexts and analyzing both negative outcomes and the development of resilience and coping strategies. The studies gathered in this volume are theoretically grounded on systemic and ecological models which analyze developmental trajectories and outcomes taking into account the interaction of different ecological systems, such as the individual, the family, the school and the wider society. Departing from this theoretical framework, the chapters in this volume analyze the risk factors posed to child and adolescent development by adverse and risky social contexts and present evidence-based interventions aimed at both preventing negative outcomes and helping children and adolescents develop coping strategies to deal with adverse situations, such as poverty and social marginalization. Child and Adolescent Development in Risky Adverse Contexts: A Latin American Perspective will be of interest to developmental, clinical, health, and educational psychologists, as well as social workers, directly working or doing research with children and adolescents in situations of social vulnerability.

Recarbonizing global soils - A technical manual of recommended management practices Food and Agriculture Organization of the United Nations 2021-09-08 During the last decades, soil organic carbon (SOC) attracted the attention of a much wider array of specialists beyond agriculture and soil science, as it was proven to be one of the most crucial components of the earth's climate system, which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals, in particular Goal 15, "Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss" with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather, in a standardized format, the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments, including the advantages, drawbacks and constraints. This manual presents different sustainable soil management (SSM) practices at different scales and in different contexts, supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications. Volume 4 includes 51 case studies dealing with cropland, grassland, integrated systems and farming approaches.

The Mother's Manual Audrye S. Arbe 2019-08-05 Who am I and where do I come to write this book? I feel it necessary to address all aspects of motherhood, so I decided to include both the sweetness and delight plus the shadow side of motherhood in this book. Some challenging life situations occur that are vital for us to consider, so I am including some disquieting statistics. Because many women (and men) have refrained from checking within themselves or making an examination on emotional, mental, physical and spiritual planes about having children, hardships have been created, both personally and planetary.

The New Fresh Seafood Buyer's Guide Ian Dore 2013-06-29 This book is a completely new edition of Fresh Seafood-The Commer cial Buyer's Guide, which was first published in 1984. There have been many changes in both product and the seafood business in the intervening years. About 70 percent of the material in this book is new, a tribute to the rapid pace of change throughout the industry. The subject of this book is fresh seafood. "Fresh" is defined as product handled under refrigeration (mechanical or ice) from har vester to consumer. This excludes frozen product, canned product and other shelf-stable packaging. Frozen seafoods are covered in the companion volume, The New Frozen Seafood Handbook. Many prod ucts are, of course, handled in both refrigerated and frozen forms. There may be substantial differences, not just in how they are han dled, but in how they are processed, graded and packed. Frozen sea foods are often treated and traded as commodities, with standard descriptions. Marketing and distributing fresh fish and shellfish, which has to be eaten within days of harvest, is necessarily more personal and direct. The contest between refrigerated and frozen seafoods has continued for many years and shows no signs of resolving. Despite massive im provements in the quality of much frozen product, consumers and their retail and restaurant suppliers still tend to believe that "fresh" is bet ter, perhaps simply because the word "fresh" is naturally appealing. *Home Staging* Klaudia Leszczyńska 2019-11-01 What you'll learn? - How to choose the type of rent that is suited to your needs, plan your strategy and define your target group. - How to evaluate your property and define the areas that need work. - A step by step guide to Staging your property, yourself. - How to set the scope of needed work, your budget and realistically estimate potential profits. - The main rules of Home Staging & how to combine colors, patterns and fabrics. - How to furnish and visually enlarge small rooms. - How to photograph your property expertly, as an amateur, and write good ads. - What to do if the property remains on the market after Home Staging.
