The Holy Greyhound Jean-Claude Schmitt 2009-04-16 The legend of a dog which is unjustly killed by its master in error, after it has defended his child from attack by a snake or wolf, appears in several popular cultures of Indo-European origin. This book concentrates on one local manifestation of the legend: a cult among the peasants of the Dombes, north of Lyons, who brought their sick child to the grave of 'Saint Guinefort', the martyred greyhound, for preservation from

disease. Providing a rare access to the underlying cultural traditions of Europe, all too often submerged in the survivals of literate culture, this book will be welcomed by a wide range of historians and anthropologists.

The Huguenots and French Opinion, 1685-1787 Geoffrey Adams 2006-01-01 The decision of Louis XIV to revoke

the Edict of Nantes and thus liquidate French Calvinism was well received in the intellectual community which was deeply prejudiced against the Huguenots. This antipathy would gradually disappear. After the death of the Sun King, a more sympathetic view of the Protestant minority was presented to French readers by leading thinkers such as Montesquieu, the abbé Prévost, and Voltaire. By the middle years of the eighteenth century, liberal clerics, lawyers, and government ministers joined Encyclopedists in urging the emancipation of the Reformed who were seen to be loyal, peaceable and productive. Then, in 1787, thanks to intensive lobbying by a group which included Malesherbes, Lafayette, and the future revolutionary Rabaut Saint-Étienne, the government of

Louis XVI issued an edict of toleration which granted the Huguenots a modest bill of civil and religious rights. Adams' illuminating work treats a major chapter in the history of toleration; it explores in depth a fascinating shift in mentalités, and it offers a new focus on the process of "reform from above" in pre-Revolutionary France. Charles II Osmund Airy 2007-09

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as

sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written.

Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant

angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches

one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Charms and Charming in Europe J.
Roper 2004-11-12 Historical records
of charms, the verbal element of
vernacular magic, date back at least
as far as the late middle ages, and
charming has continued to be
practiced until recently in most
parts of Europe. And yet, the topic
has received only scattered scholarly
attention to date. By bringing
together many of the leading

authorities on charms and charming
from Europe and North America, this
book aims to rectify this neglect,
and by presenting discussions
covering a variety of periods and of
locations - from Finland to France,
and from Hungary to England - it
forms an essential reader on the
topic.

War and Medicine Melissa Larner 2008
From the Publisher: "This illustrated
book is published to coincide with
the exhibition War and Medicine,
organized by Wellcome Collection,
London, in collaboration with the
Deutsches Hygiene-Museum, Dresden. It
explores the complex and fascinating
relationship between war and
medicine, and the ways in which they
have influenced each other throughout
the modern period. As civilizations
develop more sophisticated and

destructive technologies with which to wage war, medicine evolves to meet the needs of resulting casualties. This in turn informs advances in civilian medicine and social policy. War and Medicine charts this complex process and the ethical, political and personal issues raised." From the sometimes counterintuitive and ethically challenging principles of triage, to the recent arguments over whether and how post-traumatic stress can be clinically diagnosed, it reveals how humankind's desire to repair and heal has tried, with varying degrees of success, to keep pace with its capacity to maim and kill. The result is an engrossing history of war and medicine in the modern era.

Clusters in Automotive and Information & Communication Technology Paul J.J. Welfens
2014-07-08 Information & communication technology (ICT) and the automotive sector are two of the most important industries in the EU

and the US. The EU's eastern expansion and economic globalization have reinforced competition on the one hand; on the other hand the importance of outsourcing and off-shoring has increased. Against this background the intensification of innovation dynamics becomes crucial – and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT clusters are playing an increasingly central role in many European regions. Specialization and structural change in the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified.

Developmental Biology of Neoplastic Growth Alvaro Macieira-Coelho
2006-03-30 In this book, tumour growth is perceived as a deviation from the normal development of the human organism. The molecular, cellular, and tissue determinants of different tumours are discussed showing that each is a different disease, often corresponding to a particular developmental stage. The natural history of several cancers illustrates how clinical incidence can be just the visible part of the iceberg, while the first changes at the tissue level sometimes occur several years before tumour growth becomes manifest. Several mechanisms are proposed to explain the distribution of cancers during the human life span and the decline of the incidence of cancers during human

senescence.

Herman Boerhaave (1668-1738) Rina Knoeff 2002 Herman Boerhaave, holder of three professorships in medicine, botany and chemistry at the University of Leiden, was one of the most important and famous medical teacher in Europe. Boerhaave was also known as a very religious man. Historians of science and medicine have stressed the mechanical aspects of his medicine. Boerhaave's natural philosophy - his chemistry and alchemy as well as their uses in medicine - and methodology are all rooted in his Calvinism. In particular, Boerhaave's ideas on the

divine nature of fire, the chemical theory of menstua and the idea of seminal principles demonstrate that Boerhaave presented a Calvinist picture of the world.
